## **DETAILED ACTION**

- 1. Receipt is acknowledged of Applicant's Foreign Priority Papers, filed October 8, 2001, and January 28, 2002, respectively.
- 2. Claims 1-7 are presented for examination.
- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted Prior Art(Figure 1). The Prior Art figure 1 discloses a sand filtering device having a housing, support plate within the housing for suspending a bank of filtering sleeves(24), and a division module defined by bottom plate(22). The bottom plate is read as a division module, since it divides the airflow entering the lower portion of the housing(20). To make the support plate(21) and division module(22) separable from the housing to facilitate repair or replacement, would have been at most an obvious matter of design choice.
- 5. Claims 2-5, and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vincent(French No. 686200) is cited to show a sandblast filtering device comprising

Art Unit: 3723

filtering sleeves suspended in a housing and connected at their lower ends to an apertured module.

Any inquiry concerning this communication should be directed to Robert Rose at 7. telephone number (703) 308-1360.
